Amphibian fencing

Installation robust version

MAIBACH®
www.maibach.com

Step 1

Push the posts into the ground at intervals of 2 meters (overhanging side opposite to the road).

Leave a gap of 4 cm between the ground and the traverse.

Step 2

Insert the fence from underneath.

Step 3

Push the foil to the top...

...and press the black wedge down.

Step 4

Now press the traverse completely onto the ground.

Step 5

Align the fence lengthwise

Step 6

Tighten the first and the last post with the included pegs and ropes
